

LES ANDROÏDES

TECHNICAL DATA SHEET

/// Show during 15 at 45 minutes with 2 to 8 dancers, 1 technical staff and the choreograph.

1, 2 or 3 shows maximum for days.

We can play on different places with time to transport sound system and dancers.

/// Reserved parking place for a car and a van near the dressing room.

/// Dressing room (a large one with 2 to 8 tables) for dancers, planted at the start of the performance; with water, light food and towels.

/// Installation of sound system and robots : about 2 hours

If performance is more than a day, a safe storage for the sound system has to be planned near by (cart 3x3 m)

The sound system and the procession can not go up or down the stairs

/// We don't need more sound system or lighting, unless if the performance is for night, we have to play in a illuminated place.

/// Before the show, we have to get familiar with the surrounding : our route will be about 150m to 300m.

/// We can not perform under rain, ice, high wind and snow; a delay might be possible on the same date.
